

Alternative energy supply for the facilities of Municipal Enterprise "Cherkasyvodokanal"

Solar power plant at the Dnipro
Water Treatment Plant

Alternative energy supply for the facilities of Municipal Enterprise "Cherkasyvodokanal"

Construction of a 1MW
solar power plant at the Dnipro Water
Treatment Plant

The total cost of the project is
≈ 937 000 EUR

Construction of a solar power plant (SPP)

The projects include the following works:

purchase of equipment

installation of equipment

commissioning of SPP

electric capacity of SPP: 1 MW

Social significance of projects:

provision of 24-hour water supply and drainage for the residents of Cherkasy, in conditions of war and blackouts

reducing the risks of environmental pollution

269 000 residents of the city will receive high-quality centralized water supply services

Implementation of the project will allow:

to reduce the effects of climate change, to save 3502 trees, 37053 liters of fuel annually

to reduce the level of carbon emissions, to reduce CO₂ emissions - 27 tons/year, SO_x NO_x - 257 kg/year

meet all 100% of the electrical energy needs of Dnipro Water Treatment Plant in the summer months

to supply excess electricity to the power grid of the village of Sokyrno, where 199 residents live
