

Alternative energy supply for the facilities of Municipal Enterprise "Cherkasyvodokanal"

Modular solar power plant at the
reserve water intake "Vilshanka"

Alternative energy supply for the facilities of Municipal Enterprise "Cherkasyvodokanal"

Purchase of a 1MW
modular solar power plant at the reserve
water intake "Vilshanka"

The total cost of the project is
 $\approx 932\,398$ EUR

Construction of a solar power plant (SPP)

The projects include the following works:

purchase of equipment

installation of equipment

commissioning of SPP

electric capacity of SPP: 1 MW

Social significance of projects:

provision of 24-hour water supply and drainage for the residents of Cherkasy, in conditions of war and blackouts

reducing the risks of environmental pollution

269 000 residents of the city will receive high-quality centralized water supply services

Implementation of the project will allow:

to reduce the effects of climate change, to save 3502 trees, 37053 liters of fuel annually

to reduce the level of carbon emissions, to reduce CO2 emissions - 27 tons/year, SOx NOx - 257 kg/year

100% provision of electricity needs of the Vilshanka reserve water intake

to give surplus electricity to the power grid of the village of Sokyrno, where 199 residents live
