

Alternative energy supply for the facilities of **Municipal Enterprise** **"Cherkasyvodokanal"**

**Solar power plant of 300 kW at a
pumping station of the III-stage**

Alternative energy supply for the facilities of Municipal Enterprise "Cherkasyvodokanal"

Purchase of a modular solar power plant of 300 kW at a pumping station of the III-stage

The total cost of the project is
≈ 562 418 EUR

Construction of a solar power plant (SPP)

The projects include the following works:

purchase of equipment

installation of equipment

commissioning of SPP

electric capacity of SPP: 1 MW,
300 kW

Social significance of projects:

provision of 24-hour water supply and drainage for the residents of Cherkasy, in conditions of war and blackouts

reducing the risks of environmental pollution

269 000 residents of the city will receive high-quality centralized water supply services

Implementation of the project will allow:

to reduce the effects of climate change, to save 1061 trees, 11228 liters of fuel annually

to reduce the level of carbon emissions, to reduce CO2 emissions - 8 tons/year, SOx NOx - 78 kg/year

100% provision of the needs of the reserve water intake "Vilshanka" in electrical energy

to supply excess electricity to the power grid of the village of Sokyrno, where 199 residents live
